FINANCIAL AND COMMERCIAL.

FRIDAY, Sept. 21-6 P. M. The epeculation for a rise in railway shares re-ceived a slight check to-day in consequence of a reaction in Erie, which, after selling as high as 77% before the early session of the open board, high as 77% before the early session of the open board, declined to 75 at one o'clock. It subrequently recovered, however, to 75% and closed at 75% a %. These fluctuations act as a safety valve in every upward movement, and to argue, therefrom, against the natural tendency of prices being upward is to foster a delusion and yield to the seductions of a snare. If all the brokers and professional speculators in Wall street were to become "bears" to-morrew, their operations would not cause any material decline while hey were selling, and when they bought to cover their shorts' prices would rise higher than if all had been "shorts" prices would rise higher than if all had been united in a "bull" movement. The conditions affecting railway property and monetary affairs are such that to sell stocks "short" is to court peril, as the market is entirely under the control of the "bulls," and the activity which commenced last week is likely to last throughout the fall season, before the expiration of which stocks of all kinds will probably reach much higher prices, as the earnings of the railways will doubtless undergo a steady increase during the next few months, owing to the moving of the crops, and this, in the present temnoving of the crops, and this, in the present tem the moving of the crops, and this, in the present tem-per of the stock market, will tend to stimulate the rise.

Money is offered freely in large amounts at four per-cent, and to some of the leading dealers in government securities at three. The transactions at five per-cent are entirely exceptional and almost invariably on time, or to weak parties for small amounts.

At the open board at ten o'clock the market was rether full and the advance of varieties was not fully

rather dell and the advance of yesterday was not fully maintained. Eric (sales 4,500 shares) sold at 76% a %, Michigan Southern 85%. At the first regular board the speculative feeling was rather quiet, but the volume of speculative feeling was rather quiet, but the volume of business was moderately heavy. Eric declined on the call from 76% to 75%, closing ½ lower than at the same time yesterday. Hudson River was I lower, Reading ¾, Rock Island ¾, Northwestern ¾—preferred ¾, Fort-Wayne, ¾, Chicago land Alten ¾, Canton ¼, Mariposa preferred ½, Western Union Telegraph ½. Eric preferred closed ¾ higher, Michigan Southern ¾, Cleveland and Pittsburg ¾, Cleveland and Teledo ¾, Ohio and Mississippi certificates ¾, Mariposa common 1½. State stocks were firm. North Carolina sizes advanced ¼, new issue ¾. Tennessee sixes (new) were steady at 72¾. Government securities were inactive and barely steady. Coupon sixes of 1862

sixes (new) were steady at 72%. Government securities were inactive and barely steady. Cospon sixes of 1862 declined ¾, and the transactions in other descriptions were insufficient to make quotations.

At the one o'clock sessions the market for railway shares was steady and without any change of tone. At the half-past two board it was firmer, and Eric sold at 75%, closing % higher than at the first regular board; Reading ¾, Mariposa preferred ¾, Western Union Telegraph ¾. Michigan Southern was ¾ lower, Illinois Central ¼, Cleveland and Pittsburg ¾, Cleveland and Toledo ¾, Northwestern ¼, Chicago and Alton ¾, Ohio and Mississippi certificates ¾, Mariposa Common ¾. State stocks were weaker. 1/24, Mariposa Common 1/24. State stocks were weaker, and Tennessee sixes (new) declined 1/24, North Carolina new bonds %. Government securities continued dull and coupon five-twenties of 1885 declined %. Notwithstanding the great abundance and cheapness of money, the speculators in the latter find it difficult to sustain prices in the absence of an investment demand.

At the three o'clock open board the market was steady in tone, but prices were in some instances a fraction lower. Erie sold at 75% a %, Michi-36%—preferred (b. 3) 67%, Fort Wayne 118%.
Afterwards there was a somewhat stronger speculative feeling, but the market closed dull and stoady, and at feeling, but the market closed dull and steady, and achair past five the current quotations were:—New York Central 108% a 108%, Eric 75% a 75%, Hudson 121, Reading 116 1-6, Michigan Southern 85 a 85%, Illinois 122, Cleveland and Pittsburg 87 a 87%, Northwestern 38% a 36, Rock Island 111, Fort Wayne 105% a 106, Ohio and Mississippi certificates 25%, Canton 52, Cumberland 47% a 48, Quickilver 52% a 53, Western Union Telegraph

have shown a disposition during the last few days to en-courage the decline for the take of adding to the "short" interest and hereafter twisting the "shorts" The opening price was 143%, followed by an advance of 1/2 and a subsequent decline to 143%. From this point it railled to 143%—the closing quotation. The supply of coin for delivery was easy. Loans were made at from 1-16 to 1-64 per cent per diem In favor of the lender and without interest. The fluctua-tions in each month of the present year have been as

The Gold Board have notified those of their mambers who signed the paper in recommendation of a new market for gold, to be held in the tower hall of the Exchange, that unless they withdraw their names from such they will be expelled. This is in conformity with a resolution recently passed, prohibiting members from operating before half-past ton o'clock in the morning or offer half-past four the afformation. operating before half-past ten o'clock in the morning or after half-past four in the afternoon. The members of the existing Gold Board are, doubtless, jealous of the proposed innovation, and may, therefore, be too strongly disposed to insist upon arbitrary measures with regard to those who oppose them. We cannot see, however, how the public in to gain by the transfer of the business of the present gold room to the long room of the Stock Exchange. The admission fee to the latter is \$100, and all applicants, regardless of character or responsibility, are admitted; whereas the entrance fee to the gold room is \$1,000, and members cter or responsibility, are admitted, and members are fee to the gold room is \$1,000, and members imitted only by ballot. Under such circumstance results are security in doing bus there is obviously far greater security in doing busi-ness through the gold market as at present con-stituted than there would be in dealing with a hords of more or less irresponsible adventurers in the tower half of the Stock Exchange. It would be difficult, If not impossible, to exact the penalty of 1/2 per cent now inflicted upon members of the gold room for failures in making deliveries, if the new arrangement came into vogue, and a loose system of doing business like that which prevailed in 1863-4 would be encouraged

We have heard a rumor to-day that the Secretary of the Tressury has some intention of anticipating the futerest on the five-twenty loan, which falls due on the 1st of November, while it is reported by telegraph that the usual mob of speculators who are "short" of gold, represented by Brown, Jones and Robinson, had the impudence yesterday to cause a deputation to wait upon Mr. McCulloch in Washington and solicit him to sell some of the gold in the Treasury. We, therefore, again advise Mr. McCulloch neither to sell any portion of the ooin in his custody nor to anticipate the interest on the fire-twenty loan, for it is very clear that if he does either he will be playing into the hands of speculators. The serol-annual interest on the public debt due on the date condoned will aggregate about twenty-four millions, and although more than ten millions of it is due to bond-holders abroad its premature disbursement would be of great amistance to the present bears, who, after coveragain as they have done under similar circumstances before. The Secretary of the Treasury requires to dis-tinctly understand that the more gold be holds the than the exchange of any quantity of coin for credit than the exchange of any quantity of coin for currency. Should be fail, therefore, in his duty in this respect, as he did on one mediorable occasion before, he meat be prepared to meet popular consure and incor suspicions of the most damaging character. His business is to pay the cois interest on the patito dobt when due, and not in advance of that time, and his part experiences with regard to the sale of gold should have taught him a leases which it is non-necessary to repeat. When gold was colling at 166 % and difficult to borrow, the Secretary was urged to sell his necessary to repeat. When gold was colling at 100% and difficult to borrow, the Scorplary was urged to soil his se-called surplus, but he conited to do so, and pet it soid at thirteen per cent betow this point to-day, and it was center to lead than to borrow. Here is a practiceal example in favor of our argument. Moreover, sales of Treasury gold and payments of contract in the contract to the persure rold and derange the

nents at Washington. What the country most needs is

a stable currency, and the more gold fluctuates the more unstable the value of the currency dollar becomes.

The foreign exchange market continues firm, and there is a moderately full demand for bills. Bankers on England at sixty days are quoted at 107 a ¾; short sight, 108

Baxter closed 20c. higher than at the same time yester-day, Columbian Gold and Silver 15c., Consolidated Gregory Gold 25c. La Crosse Gold was 15c. lower. At the second Buell \$2, Rocky Mountain \$7 20. Smith and Parmise \$11 70, Walkill Lead \$2 80, Hope Gold \$2 40.
